Steve Rowland, Chris Rockey, Sultan S. Al-Lihaibi and George A. Wolff — 1 Incorporation of sulphur into phytol derivatives during simulated early diagenesis

John K. Volkman, Stephanie M. Barrett, Graeme A. Dunstan and S. W. Jeffrey — 7 Geochemical significance of the occurrence of dinosterol and other 4-methyl sterols in a marine diatom

H.-R. Schulten and M. Schnitzer — 17 Temperature-resolved in-source pyrolysis–soft ionization mass spectrometry of soil humic acids

Hao Fang, Chen Jianyu, Sun Yongchuan and Liu Yaozong — 27 Application of organic facies studies to sedimentary basin analysis: a case study from the Yitong Graben, China

William M. Sackett — 43 Carbon isotope exchange between methane and amorphous carbon at 700°C

Philip A. Meyers and Brian J. Eadie — 47 Sources, degradation and recycling of organic matter associated with sinking particles in Lake Michigan

O. Cvetković, V. Dragutinović, M. M. Vrvić, J. A. Curiale, M. Ercegovac and D. Vitorović — 57 Evidence of stable kerogen composition during bacterial depyritization of an oil shale

B. Jovančićević, D. Vučelić, M. Šaban, H. Wehner and D. Vitorović — 69 Investigation of the catalytic effects of indigenous minerals in the pyrolysis of Aleksinac oil shale substrates: steranes, triterpanes and triaromatic steroids in the pyrolysates

Roger Sassen, Harry H. Roberts, Paul Aharon, John Larkin, Elizabeth W. Chinn and Robert Carney — 77 Chemosynthetic bacterial mats at cold hydrocarbon seeps, Gulf of Mexico continental slope

J. B. Thomas, J. Marshall, A. L. Mann, R. E. Summons and J. R. Maxwell — 91 Dinosteranes (4,23,24-trimethylsteranes) and other biological markers in dinoflagellate-rich marine sediments of Rhaetian age

Short Note

Ben G. K. van Aarssen and Jan W. de Leeuw — 105 Comment on "Extraction and methylation of Latrobe Valley resinites" by M. A. Wilson, J. V. Hanna, P. A. Cole-Clarke, G. D. Willett and P. F. Greenwood

COLLECTED PAPERS FROM

THE EIGHTH ANNUAL MEETING OF THE SOCIETY FOR ORGANIC PETROLOGY

James C. Hower and Susan M. Rimmer — v — **Introduction**

Thomas Demchuk and Timothy A. Moore — 119 — **Palynofloral and organic characteristics of a Miocene bog-forest, Kalimantan, Indonesia**

Thomas Demchuk, Alexander R. Cameron and L. V. Hills — 135 — **Organic petrology of an early Paleocene coal zone, Wabamun, Alberta: palynology, petrography and geochemistry**

Brenda S. Pierce, Ronald W. Stanton and Cortland F. Eble — 149 — **Comparison of the petrography, palynology and paleobotany of the Stockton coal bed, West Virginia and implications for paleoenvironmental interpretations**

James C. Hower, Robert A. Keogh, Darrell N. Taulbee and Robert F. Rathbone — 167 — **Petrography of liquefaction residues: semifusinite concentrates from a Peach Orchard coal lithotype, Magoffin County, Kentucky**

Robert F. Rathbone and Alan Davis — 177 — **The effects of depositional environment on vitrinite fluorescence intensity**

David W. Houseknecht, David F. Bensley, Lori A. Hathon and Paul H. Kastens — 187 — **Rotational reflectance properties of Arkoma Basin dispersed vitrinite: insights for understanding reflectance populations in high thermal maturity regions**

Mary Ann L. Malinconico — 197 — **Reflectance cross-plot analysis of graptolites from the anchi-metamorphic region of northern Maine, U.S.A.**

Richard B. Winston — 209 — **Reassessment of the evidence for primary fusinite and degradofusinite**

John B. Gerlach and Karen Rose Cercone — 223 — Former Carboniferous overburden in the northern Appalachian Basin: a reconstruction based on vitrinite reflectance

Leslie F. Ruppert and Timothy A. Moore — 233 — Differentiation of volcanic ash-fall and water-borne detrital layers in the Eocene Senakin coal bed, Tanjung Formation, Indonesia

Thomas L. Robl and Burtron H. Davis — 249 — Comparison of the HF–HCl and HF–BF_3 maceration techniques and the chemistry of resultant organic concentrates

Ilham Demir, Richard D. Harvey and Keith C. Hackley — 257 — SEM–EDX and isotope characterization of the organic sulfur in macerals and chars in Illinois Basin coals

Shareen R. Yawanarajah, Michael A. Kruge, Maria Mastalerz and Wojciech Sliwinski — 267 — Organic geochemistry of Permian organic-rich sediments from the Sudetes area, SW Poland

Yalan Tang — 283 — Secondary macropores and mosaic structure in a telemagmatic metamorphosed coal and their significance in exploration for natural gas, Henan, China

Grzegorz J. Nowak — 295 — Lithotype variation and petrography of coal seams from the Żacler formation (Westphalian) in the Intrasudetic Basin, southwestern Poland

M. Mastalerz, K. R. Wilks, R. M. Bustin and J. V. Ross — 315 — The effect of temperature, pressure and strain on carbonization in high-volatile bituminous and anthracitic coals

Number 3

iii — Publisher's Note

Jaap S. Sinninghe Damsté and W. I. C. Rijpstra — 327 — Identification of a novel C_{25} highly branched isoprenoid thiophene in sediments

Padmanabhan Sundararaman and Jeremy E. Dahl — 333 — Depositional environment, thermal maturity and irradiation effects on porphyrin distribution: Alum Shale, Sweden

Francis P. Miknis, Zun S. Jiao, Donald B. MacGowan and Ronald C. Surdam — 339 — Solid-state NMR characterization of Mowry shale from the Powder River Basin

Janet Dehmer — 349 — Petrology and organic geochemistry of peat samples from a raised bog in Kalimantan (Borneo)

Keijo Lehtonen and Martti Ketola — 363 — Solvent-extractable lipids of *Sphagnum*, *Carex*, *Bryales* and *Carex–Bryales* peats: content and compositional features vs peat humification

Chao Yang and Reinhard Hesse 381 Diagenesis and anchimetamorphism in an overthrust belt, external domain of the Taconian Orogen, southern Canadian Appalachians—II. Paleogeothermal gradients derived from maturation of different types of organic matter

C. Bender Koch and F. G. Christiansen 405 Maturation of Lower Palaeozoic kerogens from North Greenland

V. Hauke, R. Graff, P. Wehrung, G. Hussler, J. M. Trendel, P. Albrecht, A. Riva and J. Connan 415 Rearranged des-*E*-hapanoid hydrocarbons in sediments and petroleum

Number 4

M. Alberdi and E. Lafargue 425 Vertical variations of organic matter content in Guayuta Group (upper Cretaceous), Interior Mountain Belt, Eastern Venezuela

Leon I. P. Dzou and William B. Hughes 437 Geochemistry of oils and condensates, K Field, offshore Taiwan: a case study in migration fractionation

M. I. Venkatesan, K. Ohta, S. A. Stout, S. Steinberg and J. L. Oudin 463 Diagenetic trends of lignin phenols in Mahakam Delta coals: correlation between laboratory thermal maturation and natural samples

G. Eric Michael, Donald E. Anders and Ben E. Law 475 Geochemical evaluation of Upper Cretaceous Fruitland Formation coals, San Juan Basin, New Mexico and Colorado

Fan Pu, Zhang Baisheng, Wang Youxiao and Ying Guangguo 499 Petroleum geochemistry of the Talimu Basin

Ulrich Ritter, Kaare Aareskjold and Liv Schou 511 Distributed activation energy models of isomerisation reactions from hydrous pyrolysis

COLLECTED PAPERS FROM

THE NINTH ANNUAL MEETING OF THE SOCIETY FOR ORGANIC PETROLOGY

Scott A. Stout and James C. Hower	v	Introduction
James C. Hower, Jeffrey R. Levine, James W. Skehan, S. J., Eric J. Daniels, Sharon E. Lewis, Alan Davis, Ralph J. Gray and Stephen P. Altaner	619	Appalachian anthracites
Charles E. Barker and Mark J. Pawlewicz	643	An empirical determination of the minimum number of measurements needed to estimate the mean random vitrinite reflectance of disseminated organic matter
H. B. Lo	653	Correction criteria for the suppression of vitrinite reflectance in hydrogen-rich kerogens: preliminary guidelines
Harry Veld, Willem J. J. Fermont and Leo F. Jegers	659	Organic petrological characterization of Westphalian coals from The Netherlands: correlation between *T*max, vitrinite reflectance and hydrogen index
Zhiwen Han, John C. Crelling and Yi Zhou	677	Fluorescence intensity and alteration of coal macerals and their relation to coalification

Jin Kuili and Qiu Nansheng	687	Application of laser-induced fluorescence of coal extracts for determining rank
Rui Lin and G. Patrick Ritz	695	Studying individual macerals using i.r. micro-spectroscopy, and implications on oil versus gas/condensate proneness and "low-rank" generation
L. D. Stasiuk, B. D. Kybett and S. L. Bend	707	Reflected light microscopy and micro-FTIR of Upper Ordovician *Gloeocapsomorpha prisca* alginite in relation to paleoenvironment and petroleum generation, Saskatchewan, Canada
Etuan Zhang, Patrick G. Hatcher and Alan Davis	721	Chemical composition of pseudo-phlobaphinite precursors: implications for the presence of aliphatic biopolymers in vitrinite from coal
Susan M. Rimmer, D. J. Cantrell and Patrick J. Gooding	735	Rock-Eval pyrolysis and vitrinite reflectance trends in the Cleveland Shale Member of the Ohio Shale, eastern Kentucky
Petra David and Willem J. J. Fermont	747	Application of colour image analysis in coal petrology
K. C. Pratt	759	The use of composite and mosaic imaging of polished surfaces to enhance petrographic analysis of coal by image analysis
T. A. Moore and K. M. Swanson	769	Application of etching and SEM in the identification of fossil plant tissues in coal
C. G. Thomas, M. E. Gosnell, E. Gawronski, D. Phong-anant and M. Shibaoka	779	The behaviour of inertinite macerals under pulverised fuel (pf) combustion conditions
B. Alpern, M. J. Lemos de Sousa, H. J. Pinheiro and X. Zhu	789	Detection and evaluation of hydrocarbons in source rocks by fluorescence microscopy
Peter J. Crosdale	797	Coal maceral ratios as indicators of environment of deposition: do they work for ombrogenous mires? An example from the Miocene of New Zealand
Lingbu Kong, Frank R. Karner, Steven A. Benson and Edward N. Steadman	811	Petrographic analysis of the Rosebud seam at the Absaloka, Big Sky, and Rosebud mines, Powder River Basin, Montana
Basim S. M. Faraj and Ian D. R. Mackinnon	823	Micrinite in Southern Hemisphere sub-bituminous and bituminous coals: redefined as fine grained kaolinite
Sharon S. Crowley, Leslie F. Ruppert, Harvey E. Belkin, Ronald W. Stanton and Timothy A. Moore	843	Factors affecting the geochemistry of a thick, subbituminous coal bed in the Powder River Basin: volcanic, detrital, and peat-forming processes
R. Sykes and J. K. Lindqvist	855	Diagenetic quartz and amorphous silica in New Zealand coals
